

HCD International Support and Alignment Network (SAN)

HealthCare Dynamics International (HCD International), a healthcare management and technology consulting firm, along with the National Council of Asian Pacific Islander Physicians (NCAPIP), National Hispanic Medical Association (NHMA), National Medical Association (NMA), and National Minority Quality Forum (NMQF) collectively represent over 60,000 minority clinicians. Together, we are the HCD International Support and Alignment Network (SAN) and we are committed to ensuring that clinicians—especially underrepresented clinicians and clinicians largely serving underserved populations— receive Transforming Clinical Practice Initiative (TCPI) training.

Through our strategic partnerships with minority physicians and quality focused organizations comprised of physicians largely serving underserved populations, the HCD International SAN will focus its efforts to improve diabetes care management through a multicultural approach to address health equity.

The HCD International SAN has the following goals:

- Help recruit 10,000 clinicians to Practice Transformation Networks (PTNs)
- Use publications, webinars, policy summits, educational events, national and regional meetings, state/local affiliates to support PTNs and to disseminate learning
- Create a TCPI focus for CME, learning collaboration, and dissemination at large annual meetings
- Develop cross-cutting population health strategies for integration of multicultural approaches for diabetes management outcomes improvement
- Provide training on demonstrated systems that can be used for measurement, health surveying and data analysis
- Provide training on the collection and use of data, stratified by race, ethnicity and language
- Provide sensitivity training on cultural and linguistic delivery of care
