

**Casey Alrich**

Director, Nurse Practitioner Support and Alignment Network  
[calrich@nncc.us](mailto:calrich@nncc.us), 215-731-2440

**Aims of the NP SAN:**

- Recruit over 7,000 NPs to enroll in PTNs.
- Improve health outcomes for over 2 million patients.
- Reduce unnecessary hospitalizations and services.
- Build the evidence base of NP practice transformation.
- Realize cost savings to the federal government.
- Move over 6,000 NPs to value-based contracting.

**Get Involved with the NP SAN:**

- Join NP SAN Community at [healthcarecommunities.org](http://healthcarecommunities.org)
- Contact the NP SAN for information on enrolling NPs into your PTN
- Visit us at [www.nncc.us](http://www.nncc.us) and [www.aanp.org](http://www.aanp.org)

The Nurse Practitioner Support and Alignment Network is a program of NNCC and supported via a National Cooperative Agreement with CMS.

# Nurse Practitioner Support and Alignment Network

November 2015

## Nurse Practitioner Involvement with TCPI

The National Nursing Centers Consortium (NNCC), in partnership with the American Association of Nurse Practitioners (AANP), is operating a Nurse Practitioner Support and Alignment Network (NP SAN) for the TCPI in an effort to promote nurse practitioner participation in practice transformation networks and provide for a wider representation of primary care providers to increase the TCPI’s capacity to reach underserved and other vulnerable populations.

The NP SAN will recruit nurse practitioners into PTNs in the following ways:

- Reach out to NNCC’s 250+ nurse-managed health center members and AANP’s 50,000+ NP membership
- Promote TCPI and PTN involvement through NNCC and AANP meetings, conferences, and specialty symposia
- Share PTN enrollment information in NP SAN programming and through targeted outreach to members
- Match NPs with PTNs based on geographic area or area of expertise
- Provide ongoing educational programming and support to NPs enrolled with PTNs to ensure they remain involved with PTNs and engaged in the TCPI process

## NP SAN Educational Programming and Content

NNCC and AANP will develop educational programming and content to support NP adherence to TCPI principles as they work their way through the Phases of Practice Transformation. The NP SAN will deliver TCPI-related content through free webinars; thousands of hours of continuing education credits; annual membership conferences, specialty conferences, and training symposia; weekly and monthly newsletters; peer-reviewed journal articles; and web-based and in-person technical assistance.

NNCC and AANP will make available existing educational content to PTNs and their NP membership and will also develop new TCPI-related educational programming in coordination with PTNs and their stated needs.

The National Nursing Centers Consortium is committed to advancing nurse-led health care through policy, consultation, and programming to reduce health disparities and meet people’s primary care and wellness needs . More information can be found at [www.nncc.us](http://www.nncc.us).
